CAREER OBJECTIVE

Delivering scalable, user-friendly web applications as a Full-Stack Developer with 1+ years of experience in JavaScript, ReactJS, Node.js, MongoDB, and MySQL. Committed to driving innovation and contributing effectively across the development stack.

WORK EXPERIENCE

Association Fullstack Developer

Jun 2023 - Aug 2024

Ebani Tech, Hyderabad

- Developed Trimx CRM using React, Node.js, Express and MySQL with TypeScript integration.
- Optimized system performance and scalability, boosting efficiency by 30%
- Led end-to-end development, reducing manual work by 40% through user-centric solutions.

EDUCATION

Bachelor of Engineering (B.E),

2017 - 2021

Dr. D Y Patil School Of Engineering & Technology

CGPA: 8.49/10

TRAININGS / CERTIFICATIONS

Full Stack Development Placement Guarantee Course

Oct 2024 - May 2025

Internshala Trainings, Virtual

Topics Learned: HTML, CSS, Javascript, Git, React, Node, Express, Jwt, Mongodb, Mongoose, DSA

Fellowship In Fullstack Development

Jan 2022 - Sep 2023

Crio.do, Virtual

PORTFOLIO

[Portfolio link ↗](#)

[GitHub link ↗](#)

PROJECTS

[Developed YouTube-Inspired Platform ↗](#)

Apr 2025 - May 2025

- Developed a YouTube clone using the MERN stack with features like video uploads, JWT-based auth, and a responsive UI.
- Implemented video playback, likes, comments, subscriptions, and personalized recommendations to enhance user engagement.

[Developed APIs with Node.js and Express.js for Shoppyglobe ↗](#)

Apr 2025

- Built a scalable backend for Shoppyglobe using Node.js, Express.js, and MongoDB with secure JWT-based authentication.
- Developed RESTful APIs for product listings, user auth, and cart management, ensuring seamless front-end integration.

[Shoppyglobe E-commerce Application ↗](#)

Mar 2025 - Apr 2025

- Developed a responsive e-commerce app with product listings, detailed views, and a Redux-powered cart.
- Implemented API data fetching, dynamic routing, search, and performance optimization using lazy loading.

[Online Library System ↗](#)

Mar 2025

- Built a responsive online library system using React with dynamic routing and component-based architecture.
- Implemented category-based browsing, real-time search, and detailed book views for a seamless user experience.

Weather Forecast Application ↗

Dec 2024

- Built a responsive weather app using asynchronous API calls to display real-time and forecast data with dynamic DOM updates for smooth user interaction.

SKILLS

- | | | |
|------------|----------------|-------------------|
| • HTML | • JavaScript | • CSS |
| • Node.js | • Express.js | • REST API |
| • MongoDB | • MySQL | • Redux |
| • React | • Tailwind CSS | • Problem Solving |
| • Teamwork | • Git | • GitHub |
| • Postman | • VS Code | |

EXTRA CURRICULAR ACTIVITIES

- 1. Participated in outdoor client shoots for advertisements, contributing to marketing and branding efforts.

ADDITIONAL DETAILS

- 1. Collaborated with the UI/UX team in my previous company, contributing to design and enhancing user experience.
